

ADECO® EXPRESS START SPRAY

Product Description:

ADECO® EXPRESS START SPRAY is an agent that enables easy start of internal combustion engines, especially at low temperatures. Protects the engine and accumulator. Lubricates and creates anti corrosive layer. Use it for both benzine and diesel engines. It enables easy engine start of cars, buses, trucks, tractors, cultivators, forklifts, boats and construction machines engines.

Purpose:

It is particularly suitable for winter conditions, at low temperatures.

The Main Advantages:

Easy engine start in 10 seconds, up to -40 °C temperature.

Physical and Chemical Properties:

Appearance	Transparent liquid
Colour	Colourless
Odour	Characteristic of the ether

Application:

It has to be injected into the suction air system of the engine for 2 to 3 seconds. Then immediately start the engine. Before use, shake the bottle.

Meet Specifications:

SRPS Z.M9.050.

Packaging:

Spray 300 ml

The bottle is under pressure. Keep away from the source of heat and the reach of children.
